RE: *Request to Eliminate the Remedial Design/Remedial Action Work Plan Addendum 3 for V-Tanks Phase 2 Treatment for Operable Unit 1-10, Waste Area Group 1 (FMDP-RFDP-06-037)*

Dear Mr. Jensen:

The Idaho Department of Environmental Quality (DEQ) has received your April 19, 2006 letter stating the V-Tanks waste has been successfully treated. The confirmation samples indicate the treatment standards have been met and the waste can be disposed of at the Idaho CERCLA Disposal Facility (ICDF). As stated in DEQ's letter dated December 6, 2005, the extension for submittal of the Draft Design/Remedial Action Work Plan (RD/RA) was extended from December 31, 2005 to May 31, 2006. Based upon the results that have been provided, DEQ is in agreement that Phase 2 chemical oxidation treatment is not needed and that the RD/RA Addendum 3 for V-Tanks Phase 2 Treatment can be eliminated.

If you have any questions please contact Ted Livieratos at (208) 373-0217.

Sincerely,

A handwritten signature in cursive script that reads "Daryl J. Koch".
